

## The Future of Wound management!

Wound management techniques and treatments have evolved tremendously over the years. While every therapeutic effort focuses on wound healing, Sepgard Rapid Gel's unique triple action (Antibacterial, Haemostatic & Hygroscopic) provides a holistic approach in Wound care management.

Sepgard Rapid Gel's efficacy is comparable to Povidone Iodine. Moreover it offers hassle free dressing and rapid wound healing which makes it better than many topical agents available in the market.

It's our vision to make Sepgard Rapid Gel every doctor's brand of choice in wound management. And every Themisian is dedicated to achieve it. And this is evident from the array of activities conducted in Nursing homes across India. With an aim of increasing usage of Sepgard Rapid Gel, Themis Medicare's Pharma Team has been conducting Nursing Home activities wherein the our field executive explains the product benefits and demonstrates its use. The response from doctors and Nursing staff has been overwhelming.

Nursing Home Activities done across India (East, North, South, West resp.)

Themis Medicare has always been in the forefront in providing novel products to the patients. Sepgard Rapid gel is yet another endeavor to offer a superior product for wound management.

It's the trust of doctors and our social responsibility which fuels our motivation to evolve better.
